Graham Medical Expands EMS Line with New Economy Bedding Products

During patient transport, bedding products are essential for patient comfort and privacy, while providing functionality and convenience to the EMS professional. Cost is always a consideration and when only basic functionality is needed, economy bedding options are preferred. Graham Medical has introduced 3 new economy disposable bedding products that provide the basic functionality needed for most patient transport activities.

Graham's new **SnugFit™ EMS Economy (Mfg. #54828)** is a fitted paper/poly backed sheet with elastic corners that provides barrier protection for the stretcher mattresses while staying in place as the patient moves. The SnugFit™ EMS Economy sheet fits standard stretchers with an overall sheet size of 30" x 84". The product is packaged in quantities of 5 sheets/poly bag (50 sheets/case) for versatility in product storage and handling. It is the only paper/poly fitted sheet on the market.

Graham has also introduced an **Economy Yellow Blanket (Mfg. #54849)** for application in identifying patients and accident victims, providing a privacy top sheet for patients in transport. This tissue/poly high-visibility blanket/drape measures 54" x 84". The Economy Yellow Blanket offers a fluid barrier and generous size for full coverage. The product is packaged in quantities of 5 blankets/poly bag (25 blankets/case) for versatility in product storage and handling.

Graham's third introduction is the **Comfort1™ Economy Blanket (Mfg. #54829)**. The blanket is an insulating nonwoven material measuring 50" x 84". It provides ample coverage yet is lightweight and utilizes ½ the space of a traditional blanket. The product is packaged in quantities of 5 blankets/poly bag (50 blankets/case) for versatility in product storage and handling.

All Graham Medical products are detailed on our website, www.grahammedical.com. For additional information or samples contact customer service at 800-558-6765 or grahammed@littlerapids.com.
