EMS Products from Graham Medical

MegaMover® Select™

The MegaMover® Select™ transport unit features multi-position handles allowing the user to select the handle that offers the safest and most comfortable position for transporting patients. It excels when maneuvering stairs by allowing the user to select a higher positioned handle or a lower positioned handle to enhance leverage, security and comfort when transporting a patient. It's made from the same high-quality materials as the original MegaMover® transport unit.

- **Sanitary and disposable** – if it gets soiled, just throw it away.
- **Strong** – holds up to 1,000 lbs.
- Durable, compact and **cost effective**.
- **Multi-positioned** handles for added safety and comfort.
- **Pull straps** for situations where pulling a patient is safer than lifting.
- **Folds away easily** – requiring minimal storage space.
