

Recycling Is Just the Beginning

Disposables are recyclable and eco-efficient. Our nonwoven, linen-like products can easily be recycled in a #5 polypropylene bin. Plus, our recyclable, single-use products offer eco-efficient advantages over reusable linens that require ongoing laundry services, high-temp water, and end up in a landfill when thrown away.

Graham Medical's gowns, scrubs, sheets and shorts are recyclable. Contact us for a full list of products.

More Sustainable Products and Practices

Pre-Consumer Recycled Content

All of Graham Medical's paper- and tissue-based products include pre-consumer recycled content. Our paper mill uses upwards of 26,000 tons of recycled fibers every year.

Biodegradable & Decomposable

When you properly dispose of any Graham Medical paper product, it's on a path to biodegrade and decompose, which means it doesn't add to a landfill — it becomes compost.

Get the true green story on disposables. Contact Graham Medical today.
