

# Fall Risk Identification Products

## Single-Use Yellow Colored Products Ideal For Fall Risk Patient Identification

- Falls account for more than 70% of the total injury-related healthcare costs among people 60 years of age or older.\*
- Yellow colored products alert caregivers to use caution with a person identified as a fall risk.
- Reduce the risk of cross contamination with single-use products.
- Patient vests, gowns and pillow cases are made of soft linen-like material that is fluid-resistant, lightweight and breathable.

Code#	Item	Material	Color	Size	Case	Quality
